

Carefree Undercoat

Professional floorcare made simple

Pre polish protection

- Porous floor seal
- Semi permanent protection
- Improved durability and gloss

Porous floor seal

Carefree Undercoat is formulated to effectively seal all types of porous floor prior to application of an emulsion polish. By acting as a protective barrier, conventional floor polish can be safely laid over-top to improve floor appearance and longevity. Carefree Undercoat is the perfect choice for any vinyl, linoleum, marble, terrazo and stone floor.

Semi permanent protection

Carefree Undercoat creates a semi permanent floor seal which means conventional floor polish can be applied and subsequently removed with no damage to the seal. In addition, Carefree Undercoat may also be removed with ease as and when required giving users total flexibility.

Improved durability and gloss

Carefree Undercoat has excellent adhesion to most floor substrates. By reducing floor porosity, floor polish performance is enhanced with improved durability and gloss. Ideal for porous floors, Carefree Undercoat may also be used on any worn or problem floor to give a superior polish finish with maximum protection.

Usage instructions

Each 5 litres polishes up to 500m².

Step one: Prepare the floor

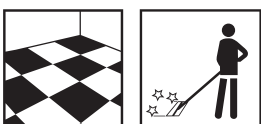

Prepare the floor by stripping with Carefree Speed Stripper (not suitable of wood floors) or Carefree Stripper. Ensure slurry is removed and the floor is thoroughly clean and dry.

Step two: Protect the floor

Apply a thin even coat of Carefree Undercoat using a suitable applicator. Allow to dry thoroughly (approximately 30 minutes). Apply a second coat beginning 15 cm from the walls. Allow to dry completely. Protect and enhance the floor by then applying 2-3 coats of a Carefree Eternum, Satin or Emulsion.

Step three: Maintain the floor

Regularly maintain the floor by damp mopping, machine scrubbing or spray cleaning. The ideal maintenance product to use is Carefree Maintainer.

Carefree Undercoat

Technical data

Appearance	Milky emulsion	S. G.	1.03
pH neat	8.0-9.0	Viscosity	Water thin
pH diluted	Not applicable		

The above data is typical of normal production and should not be taken as a specification.

Product	Pack size	Cases per layer	Cases per pallet	Article code
Carefree Undercoat	2 x 5 L	20	60	J030360

Safe handling and storage information

Keep from freezing. Do not use at temperatures below 10°C.
