 Conforms to protocols EN 1276 (inc. MRSA), EN 14476 and EN 16777.

3 Remove any visible dirt and gross contamination from the surface before cleaning.

4 Apply the solution to a cloth or spray and wipe to clean the surface/equipment.

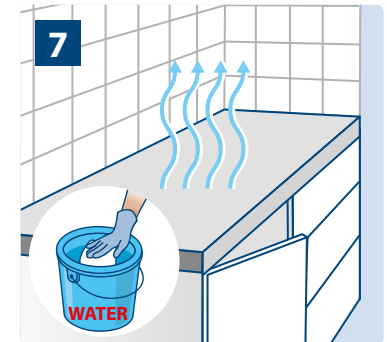

5 Re-apply the solution to the surface/equipment and allow contact time.

6

CLAIM	EN TEST PROTOCOL	CONTACT TIME
Bactericidal	EN 1276:2019 (inc. MRSA)	30 sec.
	EN 13697 (inc. <i>E. coli</i>)	5 min.
Yeasticidal	EN 16615	1 min.
Virucidal	EN 14476:2013 +A1:2015 (inc. <i>Influenza A (H1N1) Virus</i>)	5 min.
	BS EN 14476:2013+A2:2019 (Feline coronavirus)	1 min.
	EN 16777:2018 (Feline Coronavirus)	1 min.

To disinfect the surface and to meet the requirements of EN 1276, EN 14476 and EN 16777 for broad-spectrum activity against bacteria and viruses, allow 60 seconds contact time.

7 Rinse cloth in clean water, wring out and wipe surface*. Allow to air dry.

△ *Rinse the surface with clean water removes any disinfectant residue from food contact surfaces in kitchens and food preparation equipment and prevents subsequent skin contact with the product (e.g. Work station surfaces where hand and arms might rest for extended periods).
