# Protecting People With

# The Omicron Variant

Since the beginning of the COVID-19 global pandemic, we as a society have been through multiple phases. The latest phase we are now dealing with is in the form of the Omicron variant, which on early anecdotal evidence, seems to be more transmissible than the delta variant which originated from India.

At BCHS we have worked hard to give our customers access to the very best tools to keep people safe. Safe where they work, safe where they learn, safe where they meet and safe where they work.

Along the way, we have put many different methods of sanitising, disinfecting and viral prevention techniques through their paces and have only ever presented our customers with the technologies which work.

# Advanced *Disinfection*

As an owner of The Clorox Total360 electrostatic sprayer, you know about its ability to **create healthier, safer spaces.**

It has been integral to organisations across the UK keeping people safe.

# The Time to Stock Up is **Now**

With the Omicron variant posing new challenges and pushing organisations to tighten up their cleaning regimes even further, this is the time to make sure you are stocked up on Clorox chemical products.

At BCHS, we have bolstered our stock across our network but as we have seen across almost all industries, supply chains are under more strain than ever and continuity of supply cannot be guaranteed.

That is why the time to buy is **now**.
