- INCREASES RESULTS
- IMPROVES VISITOR EXPERIENCE

All-in-one odour eliminator and
multi-purpose cleaner

Versatility and safety refined

Introducing OdorBac Tec⁴

2Pure OdorBac Tec⁴ is designed up to be the safest, yet most powerful all-in-one odour eliminator and truly multi-purpose commercial cleaner in the world. With unparalleled performance, delivered instantly, as a result of 2Pure's patented technology, OdorBac Tec⁴ often replaces up to 90% of customers' existing cleaning products reducing risk, training and cost while increasing efficiency, speed and results.

Innovative features and benefits

- All-in-one product - reduces the number products required on-site
- Effective stain remover and multi-purpose cleaner for all surfaces
- Powerful odour eliminator breaks down odours at a molecular level
- Reduced health and safety risk - product has no hazard classification
- Low environmental impact
- Increases user efficiency and ease of training

Great cost in use

Comparable Cost in Use

OdorBac Tec⁴ has been benchmarked against competitors cost in use

Product Consolidation

Fewer products required on-site and stocked, less time ordering and lower costs

Time Management

Less risk assessments and easy to train new staff and supervise

Asset Protection

Extend the life of carpets and soft furnishings that are due to be replaced

Improved Efficiency

First time cleaning is essential, fast to clean and simple to use

Truly multi-purpose

In addition to the powerful problem solving abilities of OdorBac Tec⁴, it is also a truly all-purpose product.

A multi-purpose cleaning product used on all surfaces and can be applied by trigger spray, mop and bucket, extraction and scrubbing machines to effortlessly complete the vast majority of cleaning tasks.

Odour patented technology

2Pure OdorBac Tec⁴ technology is a breakthrough advancement on conventional odour 'eliminators'. OdorBac Tec⁴ traps odours within a water droplet, and then specially formulated odour destructive reagents within the formula attack an odour compound at a molecular level, changing the structure so it is no longer an odour. OdorBac Tec⁴ destroys odours on contact, and at the same time, kills odour causing bacteria, preventing odours from returning. Leaving treated areas hygienically fresh.

Safe and kind to the environment

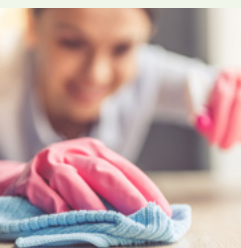

2Pure carefully selects and formulates ingredients not only to ensure safety but to optimise the sustainability of the finished product.

- 2Pure only selects ingredients that are safe for people and the environment.
- Classified as non-irritant, non-hazardous and is 100% biodegradable.
- OdorBac Tec⁴ patented technology uses less raw materials than conventional products.

Case Study: Care Home Group

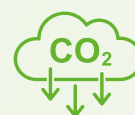

OdorBac Tec⁴ will not only remove stubborn odours but also works just as well on all other surfaces as an all-purpose cleaner. This enables an entire building to be cleaned with just one product while enhancing the environment for staff, visitors, and care home residents.

A top 5 UK national Care Home group rolled out the use of OdorBac Tec⁴ as its sole cleaning solution across all of its estate. The product is used in residents' rooms, front of house, corridors, and communal areas across the portfolio. The Care Home was able to replace 90% of the cleaning products used, reducing risk, training requirements, and environmental impact, while increasing efficiency, speed, and results.

The Care Home group chose 2Pure OdorBac Tec⁴ as its cleaning product of choice and continues to use the multi-purpose solution in every single one of its care homes daily. Since the introduction of OdorBac Tec⁴, progress has consistently improved with residents and their families scoring the cleanliness and odour control of the Care Homes higher in regular independent satisfaction surveys.

Closed loop recycling solution for all packaging

Introducing LoopBox™ from 2PURE

2Pure uses 100% recycled plastic for its 5 litre containers and offers customers the opportunity to **STOP PLASTIC WASTE PACKAGING** by signing up to the closed-loop recycling program LoopBox™.

- Standard OdorBac Tec4 cardboard cartons become a LoopBox™
- The LoopBox™ is made of cardboard and is used multiple times reducing packaging waste
- LoopBox™ is used to transport OdorBac Tec4 product containers to and from the customer site

Keeping it simple

HOW IT WORKS:

1. Customer fills the LoopBox™ with four empty OdorBac Tec4 containers
2. Customer books collection with Bunzl
3. On the next OdorBac Tec4 order a new LoopBox™ is supplied

Simple and easy way to stop plastic waste packaging

100% recycled plastic container enters the loop
