

# Product Award

A visual indicator of a product's **sustainability** to support decision-making by using an objective set of **key sustainable attributes**.

Built with our customers in mind, our Sustainable Solutions™ Product Award helps overcome the difficulties of finding sustainable products by making it easier for you to identify our sustainable product options. The Product Award is a visual indicator of product sustainability, to help you make an informed decision when looking for the most suitable products for your cleaning and hygiene needs,

improving access to sustainable choices and driving positive change through our supply chain.

**Cleanline Eco Ultra One Sanitising Wipe Tub 100 Wipes**

## The defined categories graded for each product:

PRODUCER

PACKAGING

PRODUCTION

PRODUCT

We have defined a comprehensive set of criteria across our product categories to objectively assess the sustainability of our products against one another. This criterion falls into four categories: Producer, Production, Packaging and Product. Depending on its performance against the criteria, a product will receive an award in each key category of Bronze, Silver, or

Gold, or No Award if the minimum threshold is not met.

From these awards, a total score is calculated accounting for performance across the four categories.
