

Tork Cleaning Cloth

Colour: White Format: Folded

benefit

- exelCLEAN™ for higher cleaning efficiency
- Multipurpose - handles most cleaning tasks
- Soft and flexible - ideal in tight spaces
- Food contact approved

Chemical pulp

Polypropene

Polyester

Chemicals

Material

Chemical pulp

Chemical pulp is produced either from softwood or hardwood. The wood chips are boiled together with chemicals and the major part of the lignin is removed. Chemical pulp is bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

There are two major bleaching methods: ECF (elementary chlorine free) and TCF (totally chlorine free).

ECF is based on oxygen, chlorine dioxide and hydrogen peroxide. TCF is based on hydrogen peroxide and ozone.

ECF is used in this product.

Polypropene

Polypropene fibre is produced from polypropene resin. The resin is melted in an extruder and spun to fibres through spinnerettes and cooled with air. Fibres are then cut to intended fibre length.

Polyester

Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerettes and cooled with air. Fibres are then cut to intended fibre length.

Chemicals

Both functional and process chemicals are used. The functional chemical used is wet strength agent. The wet strength agent is a polyamide (from polyamidine/epichlorohydrin polymer) with a very high affinity to the fibre.

Process chemical used is a surfactant.

Tork Cleaning Cloth

Colour: White Format: Folded

Production

The material is produced at Suameer mill, NL, certified according to ISO 9001:2000, ISO 14001 and EMAS. Product converted externally in DE.

Disposing / destruction of used product

This product is mainly used for industrial processes and might through use be contaminated with different substances. This will determine how the used product will be handled / disposed of / destructed. The product itself is suitable for incineration. Contact local authorities before destruction.
