+ 100% microfibre	- Laundry facility
+ Excellent cleaning	
+ Superior hygiene	
+ >99% bacteria removal	
+ High coverage	

TASKISUM Single Use Microfibre cloths and mops.
Adding up all the benefits of effective cleaning and superior hygiene.

TASKISUM Single Use Microfibre cloths and mops.

Adding up all the benefits of effective cleaning and superior hygiene.

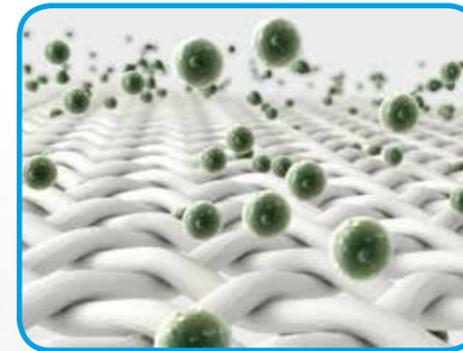

TASKISUM. SINGLE USE. MULTI BENEFIT.

Does your environment demand hygienic cleaning that only microfibre can offer, but is it hard to organise the necessary laundry around that? Meet TASKISUM Single Use Microfibre and experience the convenience of single use mops and cloths with the excellent performance of 100% microfibre. Its immediate removal of 99% of bacteria helps prevent cross contamination in critical hygiene areas and make your environment a healthy one.

MASTERS IN SUPERIOR CLEANING

Always committed to developing new and better ways of cleaning, we at Diversey Care have become specialists in microfibre. We were among the first to bring a pre-wetted microfibre cleaning system to the market. After 10 years in use, we have extensive experience working with customers who require excellent results, high productivity and maximum hygiene security. **For the first time TASKISUM Single Use Microfibre will give customers access to all of these benefits without the need for laundry facilities.**

Easy 4 Step Program

+ 100% MICROFIBRE

The fibres in microfibre are incredibly thin: 1/100 of the size of a human hair. That is smaller than most bacteria or dust particles. This allows them to trap and collect dirt and bacteria more effectively than regular fibres.

+ 99% BACTERIA REMOVAL

TASKISUM microfibre is proven to remove over 99% of bacteria, compared to 30% with traditional cotton fibre.

+ SUPERIOR HYGIENE

With its outstanding performance TASKISUM will give you peace of mind, providing a safe and healthy place for patients as well as staff and public.

+ EXCELLENT CLEANING

Cloths feel comfortable in hand and the low friction mops are easy to use. Both provide excellent cleaning results, similar to that of launderable microfibre.

+ HIGH COVERAGE

Our cloths will completely cover a one-bed space in a high hygiene area. Our mops will cover up to 20 m², which is amongst the highest performance and coverage in the market.
