

# Tork Industrial Cleaning Cloth

Colour: Grey Format: Folded

## benefit

- exelCLEAN™ for higher cleaning efficiency
- Good oil and water absorption
- Soft and flexible
- Works well with most solvents
- Food contact approved
- Tork Easy Handling™; packaging easy to carry and easy to flatten

## product properties

article	system	Ply	Print	Embossing	Colour
520371	W7 - Handy box system, W7 - Handy box system	1	no	no	Grey

## description

A soft and flexible cloth that is excellent in tight spaces, and ideal for cleaning oil and grease. The cloth provides a professional cleaning result thanks to the exelCLEAN™ effect.

## environmental

### Content

Cellulose pulp

Polypropylene fibres

Polyester fibres

Chemicals

### Material

#### Cellulose pulp

Cellulose pulp is produced either from softwood or hardwood. The wood chips are boiled together with chemicals to remove the lignin between the fibres. The pulp is bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

There are two major bleaching methods: ECF (elementary chlorine free) and TCF (totally chlorine free).

ECF is based on oxygene, chlorine dioxide and hydrogen peroxide. TCF is based on hydrogen peroxide and ozone.

ECF is used in this product.

#### Polypropylene

Polypropylene fibres is produced from polypropylene resin. The resin is melted in an extruder and spun to fibres through spinnerettes and cooled with air. Fibres are then cut to intended fibrelength.

The fibres used contains black pigments.

#### Polyester

Polyester fibre is produced from terephthalic acid and ethyleneglycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerettes and cooled with air. Fibres are then cut to intended fibrelength.

#### Chemicals

Both functional and process chemicals are used. The functional chemical used

is a wetstrength agent. The wetstrength agent is a polyamide (from polyamidine/epichlorhydrinepolymer) with a very high affinity to the fibre.

The process chemical used is a surfactant.

#### Production

This product is produced at Suameer mill, The Netherlands, and certified according to ISO 9001:2000, ISO 14001 and EMAS.
